EXPERIENCE

KSIBS — Java Tutor

Birmingham / November 2019 to November 2019

I got a chance to host my own coding sessions at a high school where I am teaching simple Java programming using software called Processing. All the content and teaching methods were created by me and it demonstrated to be an effective and helpful way for the students.

KSIBS — Coding Volunteer Teaching

Birmingham / August 2019 to August 2019

The project was a Summer Code Camp, which was an option for children that wanted to try and dip their feet in coding during holiday. My job was to teach and help them understand how coding works by using simple and non-technical vocabulary, so that they could get all that knowledge.

Ace Hub at Solihull College — Web Developer

Birmingham / November 2018 to March 2019

Redesigning and create a whole new website from scratch for a hair and beauty saloon called Born Beautiful. The website had to meet requirements specified by the client, and also include all the detail provided by them.

Digital Innov8ors — Mobile App Development

Birmingham / May 2018 to July 2019

Project called 'Adventures in Bodiwell', which was based on the book under the same name. The idea was to create an application for children that would help them learn and understand different parts of human organism.

(Software & Games Development)
2017 - 2019

Solihull College

OCR Level 2 Computing
2016 - 2017

QUALITIES

I am a very **optimistic** and **energetic** person who can work in a team without any issues and can take **responsibilities**. I am also **self-motivated** and **punctual**, because I do not enjoy wasting worthy time and would rather spend it in a productive way, for example by working on my personal projects such as designing and development, or just doing research and gaining knowledge.

AWARDS

Student of the Year

Solihull College (2017)

INVOLVEMENT

OPG Hack Day

Hackathon Participant (2018)
